## **DETAILED ACTION**

### ***Election/Restrictions***

- Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1, 6, 10-21, 27 and 28, drawn to a system for obtaining a recommendation by analyzing relationships among a plurality of received user opinions to determine which other users have a similar personal construct and generating recommendation, classified in class 707, subclass 2.
  - II. Claims 7, 8 and 25, drawn to a system for generating a recommendation by retrieving user rankings to produce entailment values for comparison, classified in class 707, subclass 6.
  - III. Claim 26, drawn to a system for adjusting the statistically- based process by determining actual user behavior and comparing the recommendations against the actual user behavior, classified in class 706, subclass 45.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, Group I is drawn to a system for obtaining a recommendation by analyzing relationships among a plurality of received user opinions to determine which other users have a similar personal construct and generating recommendation, Group II is drawn to a system for generating a recommendation by retrieving user rankings to produce entailment values for comparison, Group III is drawn to a system for adjusting the statistically- based process by determining actual user behavior and comparing the recommendations against the actual user behavior. See MPEP 806.05(d).

Art Unit: 2169

- Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- Applicants are advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- Applicants is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CR 1.48(b) and by the fee required under 37 CFR 1.17(i).
